

## SYMMETRY PANORAMIC FUNDS UPDATE

### Update:

We are excited to announce that we've added a new manager, Avantis Investors, to the Symmetry Panoramic Funds.

### What are the potential benefits of adding Avantis Investors to the funds?

- Ability to expand our tax loss harvesting capabilities, further diversify our existing positions, and more easily manage factor exposures in our funds.
- Expanded diversification of targeted factor capture, and ETF vehicle designed to help reduce costs.

### Why Avantis Investors?

As a best-in-breed, multi-manager, multi-factor solution, the Panoramic Funds seek out the most optimal way to execute the best ideas from both financial services and academia. After a thorough analysis of the marketplace, and a review of the most appropriate vehicles for adding to the funds, the Portfolio Management team determined that the strategies offered by Avantis were consistent with our academically-derived philosophy and were a good overall fit, complementing other positions in the funds.

Diversification seeks to reduce volatility by spreading your investment dollars into various asset classes to add balance to your portfolio. Using this methodology, however, does not guarantee a profit or protection from loss in a declining market.

Investment Companies and Exchange-Traded Funds Risk. When the Fund invests in other investment companies, including ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including the management fees of the Underlying Fund in addition to those paid by the Fund. The risk of owning an Underlying Fund generally reflects the risks of owning the underlying investments the Underlying Fund holds. The Fund also will incur brokerage costs when it purchases and sells ETFs.
